Get GOOGLIZED!

Many schools are looking to Google as a solution to providing a collaborative environment for their students and teachers. In this session, you will learn how to create and share documents and presentations with students, learn some basic spreadsheet functions, use forms to create quizzes, and scripts to automate your workflow. We will also touch on some Chrome Apps & Extensions that can help personalize the learning experience.

Let's get googlized!

Pre-requisite: Need a Google Apps for Education (preferred) or Gmail/Google account.
