CSI Data Investigations
(formerly Data Retreat)

Presented by:
Kathryn Richardson,
Lisa Arneson

August 17, 2010
At CESA 5 in Portage

Join us on August 17, 2010, for the annual Continuous School Improvement (CSI) Data Investigations (formerly called Data Retreat). The basic structure of the session will continue to be built upon the WKCE test data analysis. More attention will be placed upon the opportunity to track students, including subgroups, from year to year now that testing is longitudinal. Test data will be broken down to the school level. In addition, local assessment will become an important part of tracking student progress as data becomes available.

We will also be looking at the development of school improvement plans (SIPs). Teams will take the SIPs to the point of progress monitoring throughout the school year **and** include a breakdown of individual responsibilities in that process. The CSI Investigations process is a strategy for school and district leaders to work toward developing annual school improvement goals.

Who Should Attend?

School Data Retreat® Workshops are intended for school administrators and teachers from key grade levels and subject areas.

Comprehensive Data Tools

Each participant will receive a comprehensive data binder as well as annual access to our newest web-based tool, Blue Star Data Systems.

CSI Investigations Agenda

Overview of WKCE Annual Test Result binder:

- District Proficiency Scores, Grades 3-8 & 10
- Subgroups/Student Demographics
- Issues and Concerns facing DACs
- Questions

Item Analysis and More:
