

Early Childhood Network 2014-2015

Supporting Language and Early Literacy for ALL Learners

Continuing our tradition of offering networking opportunities to the early childhood care and education workforce in our region, ECN is designed as a five-part series for the 2014-2015 school year.

All registered participants will receive a copy of

- *Exploring Language and Literacy (NAEYC)*
- *Writing in Preschool: Learning to Orchestrate Meaning and Marks (International Reading Association)*

This series of professional development is designed to promote evidence-based universal practices that support the standards-based content areas of early literacy. Participants will explore these practices for supporting and assessing children's language/literacy development, gaining family involvement, and addressing the needs of all children, including Dual Language Learners (DLL), children with disabilities, and those with other special needs. This course encourages critical thinking, reflection, and self-evaluation through cooperative learning experiences and bookmaking/make-and-takes with special emphasis on developmentally appropriate practice, WMELS, and the appropriate use of technology (iPad/Apps) to promote early literacy.

Register Today!

Registration required for all (5) sessions, prearranged absences are appreciated!
Space is limited!
