

Ensuring Accuracy With Your ISES Data

The Individual Student Enrollment System (ISES) includes student demographic and outcome data needed to meet the ESEA report card requirements at the state, district, and school levels. While this is often simple data entry, coding errors can negatively impact your school report cards and testing results.

ISES DATA VERIFICATION IS ESSENTIAL!

Learn more about ISES and the reports you need to verify from Kari Krakow, Lead Trainer at the WiRCC:

- 3rd Friday Enrollment
- Child Count
- Exits
- Dropouts
- Attendance
- Retention
- Testing Rosters

Designed for teams of building administrators and ISES data entry personnel, this training will provide you with better ways to enter and manage essential student data for accuracy! Bring your laptops, logins and questions.

Pre-registration is required on myquickreg.

October 21, 2014

9:00—Noon Training with Kari

12:30—3:00 Team time to look at your ISES data

Cost: 25\$ for SIS members/\$100 for others

Location: CESA #4 (Lunch will be provided)
