ENGAGEMENT AND SUCCESS FOR ALL:
UDL – Using the iPad and Chromebook

Universal Design for Learning (UDL) provides a framework to help you sort through the 100's of apps and extensions for iPads and Chrome helping you select the best possible ones to provide all of your students with successful experiences in learning, communication and engagement with the curriculum.
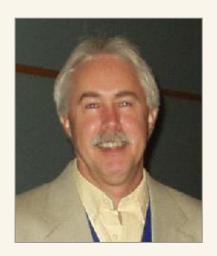

Learn how to apply that framework with apps and extensions that can be utilized across all subjects throughout the school experience. Examples will include visual supports, integration with Interactive White Boards, assessment tools, homework supports, switch accessibility and more to provide all learners with multiple means of engagement, access to the curriculum, and to communicate what they've learned! Included will be apps, extensions and hardware solutions that add enhanced interaction with projectors, broadcasting document camera images to iPad screens, distributing files, broadcasting sound and more.

PRESENTED BY: DAN HERLIHY,
CONNECTIVE TECHNOLOGY SOLUTIONS, INC.

Dan Herlihy is a national conference presenter on topics ranging from Creating Access on the Fly, Working with High and Low Incidence Disabilities, Creating Access to the Arts and Using Digital Images in the Classroom as a Teaching and Learning Tool. His expertise is in taking diverse technologies, and connecting them together to provide solutions for access.
